AKNENOREN

CREAM

AZELAIC ACID

Like AHAs in cosmetic products, it is used to exfoliate the upper layers of the peel. It removes dead skin from the skin, prevents clogging of discharges and evens out skin tone by targeting brown spots. It is used by people who are prone to acne, rosacea formation and hyperpigmentation due to its antibacterial properties.

TEA TREE OIL

Tea tree extract is an essential oil with a natural antimicrobial effect. Provisions that stand out with their anti-acne feature by preventing the features that cause acne formation. It is also widely used with its cleansing, soothing and antiseptic properties.

HYALURONIC ACID

While protecting the skin very well, it helps to prevent or delay the transitions that occur with age. It can hold more water than its own weight.

SULFAR

Sulfur is found in all living tissues. It is the third most abundant mineral in the human body. Sulfur is known to be anti-bacterial against once – causing bacteria. It also helps support their extension and propagation. This is also known to help treat skin condition like seborrheic dermatitis or acne.

USAGE

You can use it once a day, by applying it to the whole body, on dry skin it is recommended to apply twice a day.
50 ml e

USES:

Due to Tea Tree Oil and Azelaic Acid in its content, it helps to tighten the pores on the skin and repair the skin texture and gives the skin a natural shine. Due to hyaluronic acid and vitamin E, it helps your skin to gain a smooth appearance by balancing your skin natural moisture.
