RICHSKIN

C R E A M

■ SHEA OIL

Softens and softens skin. /Keeps skin in good condition.

■ **PANTHENOL**, Panthenol is an alcohol derivative of pantothenic acid, which is part of the B-complex vitamins and is an essential component of healthy epithelium. Dexpanthenol, the active formula of panthenol, is enzymatically degraded to form pantothenic acid.

Vitamin B5

An essential component of Coenzyme A, which acts as a cofactor in many enzymatic reactions important for protein metabolism in the epithelium.

■ UREA

It reduces moisture loss in a cosmetic product. In skin care, it acts as water enrichment and moisturizing of the epidermis. It is an important efficiency that helps the skin retain water and keep it plump, elastic and hydrated. It will sound like a mild keratolytic agent. thus it also ensures the removal of dead vacuum cleaners.

■ GLYCERINE, Glycerin

also known as glycerol, is a natural liquid derive from vegetable or animal oils. It is a clear, colorless, odorless and viscous liquid with a sweet taste. It is used to help draw moisture to the skin.

■ HYALURONIC ACID

While protecting the skin very well it helps t6 prevent or delay the transitions that occur with age. It can hold more water than
